

# Women Leadership Community: *A Mentorship-Based Program*

Leadership roles for women continue to be a complex and challenging landscape to navigate. That is why we developed a unique mentorship program for new and emerging leaders that centers around the idea of creating a support network of women leaders.

We are looking for new and emerging leaders who are eager to invest in themselves and are ready to work together, with the guidance of experienced leaders, to maneuver real-life situations.

## Your Leadership Mentors:

**Rebekah Mussman**

*"We developed this program to build a network of strong, confident, women leaders. It is a safe space for emerging leaders to learn and grow, while also creating a network of professional contacts that will last well beyond the 12 months of the program."*

Rebekah has over 20 years of leadership experience within the healthcare realm. From serving as a Director of Health Information Management, Quality Improvement Coordinator, HIPAA Officer, CFO, and CEO to serving on multiple association and foundational boards. Her expansive spectrum of roles throughout the leadership hierarchy allows her to see the viewpoints from all sides and provide the best guidance on the smoothest path to take.

**Amber Ackerson**

*"Women leaders face unique challenges, and what I have found to be one of the most important assets is a supportive network. This program is for real women, facing real issues, and never facing them alone. You can never have too many like-minded individuals in your circle."*

Amber has a broad range of leadership experience in human resources within manufacturing, an attorney in private practice, a clinic manager, a hospital board member, and now an in-house legal counsel. Her knowledge of handling contrasting atmospheres allows her to be prepared for the unexpected and face every challenge head-on with a clear mind.
