

Women's Leadership Community

- Testimonials -

*"When I started the Women's Leadership community, I had been a leader for less than 12 months and had never led adults. This community has given me several tools to better manage my staff. I have learned a lot about myself and how to **show up with professional presence**. I have learned to have difficult conversations and how to develop my team.*

*The books we read in this group are not typically what I would choose to read so I was pushed out of my comfort zone and have learned so much through them. Even more important is the relationships I have been able to build with other women in leadership in the healthcare space. **Having a group of women who understand the struggles of being a leader in healthcare is invaluable**. I'm so grateful for this group and how it has allowed me to grow into the leader I am today."*

- Business Office Manager

*"I've had a lot of experience in leadership training but the ruralMED's Women's leadership training **offers something completely different**. You get the opportunity to connect with other women leaders outside of your normal circles, whether that be clinical or non-clinical. The ruralMED Women's leadership is about **collaboration, inspiration, and empowerment!**"*

- Senior VP of Clinical Operations

*"I truly enjoyed working with a great group of women who were willing to connect and share their thoughts, ideas, and experiences. This community has helped me to **feel more confident** as a leader and allowed me to network with others who have been supportive and caring in my career. I would recommend this to anyone who is willing to put themselves out there to learn and **grow with other Women Leaders**."*

- Chief Nursing Officer

*"ruralMED Women's Leadership Community has been a **wonderful addition** to my Leadership training. What I have enjoyed the most is that Rebekah and Amber make this a fun and relaxed environment yet being available for hard conversations and giving **insight into my needs**. The networking within the group is invaluable and I now have nine new colleagues friends!"*

- VP Patient Care Services, CNO
